(1) Past returns do not guarantee future returns. Past performance is not a guide to future performance. The performance data does not take into account of the commissions and costs incurred on the issue and redemption of units. The value of investments and any income is not guaranteed and can go down as well as up and may be affected by exchange rate fluctuations. This means that an investor may not get back the amount invested. Index returns assume reinvestment of dividends and capital gains unlike fund returns do not reflect fees or expenses.

The Fund seeks capital preservation and long term appreciation by investing mainly in public debt securities, although also private, with a maximum exposure of 15% in equity. Investments may entail, among others, market risk due to volatility of equities, exchange rates, investment in emerging countries, as well as geographic and sector concentration.

**Investment manager**

Cobas AM was founded in 2017 by Francisco García Paramés, a highly reputed portfolio manager with over 25 years of extraordinary track record. Mr. García Paramés leads a portfolio management team of six analysts fully dedicated to a single investment style: Value Investing.

**Investment Strategy**

The investment team's objective is to construct a longonly diversified portfolio, without leverage or derivatives, that offers investment opportunities with an attractive risk/return ratio. It will be possible to trade with financial derivatives, with hedging purposes.

The investment philosophy related to the exposure to debt securities will be focused on public issuers, although also private, of at least investment grade credit quality (minimum of BBB- by Standard and Poor's or equivalent) or that of the Kingdom of Spain if it is lower, from issuers/markets within the European Union. A maximum of 10% of the total assets of the fund may have lower than BBB- credit rating or no rating, from issuers/markets of any geographical area, including emerging countries. For unrated issues, the rating of the issuer will apply. With respect to equity exposure, the manager relies on his fundamental "bottom-up" research and investment experience to identify companies that are below their intrinsic value. The Fund's portfolio does not track any market benchmark.
